## Technical Information

**Interface® with StressGard™ Formulation Technology is a new generation turf fungicide which delivers thorough disease control leading to visibly healthier turf.**

Bayer's mission is to support Turf Managers in their quest to deliver the ultimate playing experience. This means controlling turf disease, managing turf stress and maintaining turf quality. Bayer has led the way for over 30 years, building on the strengths of market defining products and we continue to research, develop and test new innovations.

### Diseases Controlled

- Dollar Spot
- Brown Patch
- Fusarium Patch
- Helminthosporium
- Rust
- Grey leaf spot

### Areas of use

Golf and bowling greens; recreational turf; race tracks and other intensively managed turf.

### Key features

- ✓ Powerful: Delivers unsurpassed disease control and long lasting protection against 6 key turf diseases leading to visibly healthier turf
- ✓ Flexible & Convenient: Can be used at any stage of the disease cycle and at any time of the year.
- ✓ Innovative: The latest innovation in turf fungicide formulated using StressGard™ Formulation Technology
- ✓ Peace of mind: Intelligent Turf Management.

### Application rate and delivery

- 12.5 litres per hectare
- For use on closely mown, professional and recreational turf surfaces, e.g. golf greens, professional sports grounds, race tracks, bowling greens, pitches and lawn tennis courts throughout the year.
- During the spring/summer/autumn when turf is actively growing; during the winter when turf is slow growing or near dormant, or at times of increased disease stress.
- For best results, apply just before or at the first signs of disease to prevent scarring.

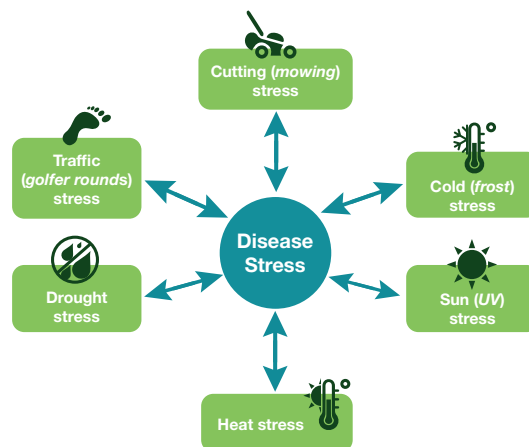

### The science behind healthy turf

StressGard™ Formulation Technology is unique to Bayer, has taken over 15 years of Research and Development and has been specifically designed for turf.

StressGard Formulation Technology is our most advanced turf formulation yet. The formulation has been fine tuned to upgrade the performance of the product, providing superior disease control leading to visibly healthier turf.

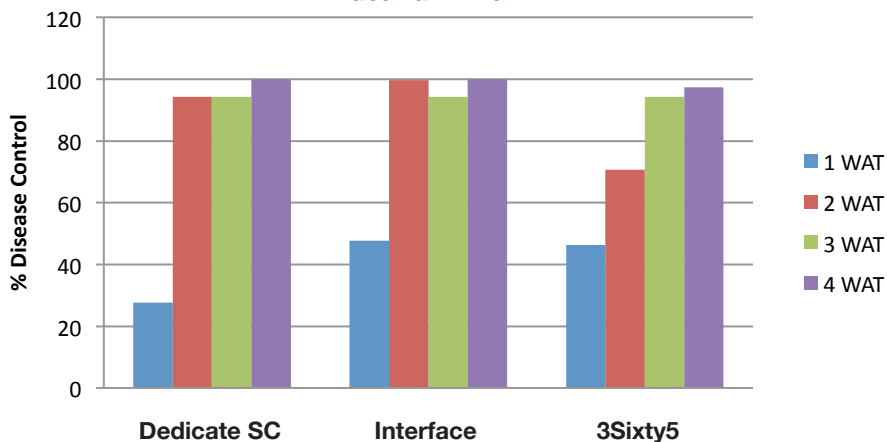

StressGard Formulation Technology helps the plant to thrive under disease stress conditions.

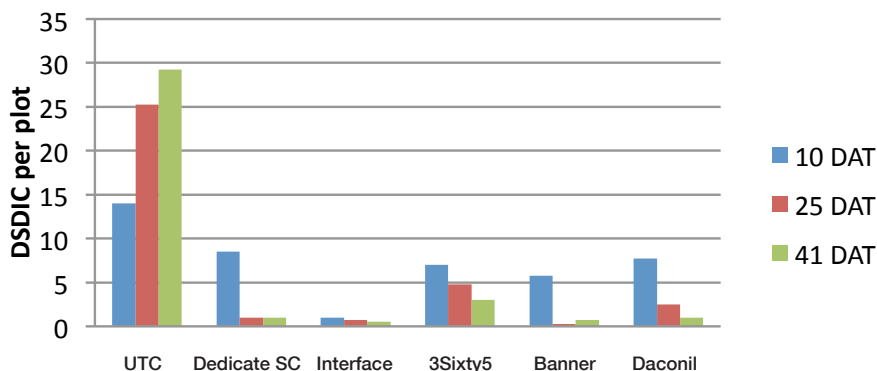

# Interface®

## Fusarium Trial

WAT - Weeks After Treatment

## Dollar Spot Trial

DSDIC - Dollar Spot Disease Infection Centres

DAT - Days After Treatment

## Product Profile

**Active ingredient information:**  
Iprodione and Trifloxystrobin

**Chemical Group:** Group 2 (Dicarboximide) and Group 11 (QoI)

**Formulation Type:** Suspension Concentrate

**Pack sizes available:** 5 L

## Product safety

**Personal Protective Equipment required:**

When opening the container, mixing and loading and preparing spray and using prepared spray, wear cotton overalls buttoned to the neck and wrist and elbow-length chemical resistant gloves. When using prepared spray by low pressure hand wand, wear cotton overalls, over normal clothing, buttoned to the neck and wrist and a washable hat and elbow-length chemical resistant gloves.

No products produced by Bayer Environmental Science have been shown to be carcinogenic, teratogenic or mutagenic.

## Regulatory information

All pesticides are regulated under the Agricultural and Veterinary Chemicals Act to ensure that they do not pose an unacceptable risk to human health and the environment.

For information regarding pesticide regulatory process please visit the Australian Pesticides and Veterinary Medicines Authority website at [www.apvma.gov.au](http://www.apvma.gov.au)

## Best practice guidelines

- Interface can be used in Summer for dollar spot and brown patch control without risk of negative DMI turf growth effects
- Interface promotes plant health
- Interface controls spring and autumn diseases like helminthosporium and fusarium
- Interface has multiple modes of action to manage fungicide-resistant plant pathogens
- StressGard Formulation Technology is contained in Interface for plant health promotion effects, summer stress reduction, UV radiation management, and improved turf color and density.
