### Important Information

- Always water fertiliser in well, immediately after application. Watering should involve a thorough saturation of the area.
- Avoid direct contact with plant roots, seeds etc
- Sandy soils will require lower rates of fertiliser but more frequent applications
- It is much safer to apply small amounts on a regular basis
- Do not exceed recommended application rates as this can be harmful to plants.
- Even, light and regular applications of a quality product will achieve best results.
- Always reseal bags after use and dispose of empty bags properly.
- This fertiliser contains biuret. It is not recommended for repeated foliar application on horticultural crops.
- Apply sparingly on potted plants as excessive fertiliser can cause burning relatively easily.
