

Long Paddock

RAPID UPTAKE

11-2-10 + KELP + FULVIC ACID
Plus 14% ORGANIC CARBON

*The Long Paddock **RAPID UPTAKE** is an Organic Liquid Fish Concentrate that has been formulated for progressive Turf Managers seeking biological and environmental outcomes to their Turf Management programs.*

PRODUCT BENEFITS

- The unique biological formulation will ensure rapid plant recovery from turf renovations, heat & cold stress, shade as well as low light intensity caused by extended wet weather periods
- "K" is in the readily available low salt Citrate Soluble form
- The rapid uptake of potassium in the Citrate form will excellerate essential photosynthesis
- The natural fish oils contained in the European Carp enhance fast nutrient uptake via leaf absorption
- Fulvic Acid is a natural chelating agent that also increases the permeability of plant cell walls, improving the uptake of nutrients
- The addition of Tasmanian Bull Kelp is an essential bio-supplement which can provide; enhanced frost resistance, bio-balancing, root promotion and stress resistance
- Increases essential soil carbon
- Encourages beneficial microbe stimulation
- Assists in the breakdown of organic matter
- The unique processing of the whole European Carp & Kelp provides natural minerals, oils, amino acids, proteins, vitamins and sugars
- Promotes even growth and turf density without surge effects
- Promotes strong Brix levels that improve the plants natural immune systems
- Plant Brix levels refer to the level or amount of Proteins, Vitamins, Minerals and in particular Sugars that exist within a healthy plant

Long Paddock

RAPID UPTAKE

11-2-10 + KELP + FULVIC ACID
Plus 14% ORGANIC CARBON

TYPICAL ANALYSIS %		New Long Paddock Rapid Uptake includes the important trace elements; Sulphur, Magnesium, Sodium, Iron, Manganese, Zinc, Copper, Cobalt, Boron and Molybdenum.
NITROGEN (N)	11.0	
PHOSPHOROUS (P)	2.0	
POTASSIUM (K)	10.0	
ORGANIC CARBON	14.0	
KELP w/v	10.0	
FULVIC ACID	2.0	
pH	6.2	

APPLICATION RATES

TURF AREA	PRODUCT APPLICATION RATE	WATER RATE
Greens -Foliar	Bi-Weekly 7-10 L/Ha	500-700 L/Ha
	Monthly 10-15 L/Ha	500-700 L/Ha
Tees -Foliar	Monthly 15 L/Ha	500-700 L/Ha
Fairways -Foliar	Quarterly 10-15 L/Ha or as a supplement in between granular applications	400-600 L/Ha
Landscape Gardens <small>(Apply until run off with Hand Gun or Fish Mouth nozzle)</small>	10-15 L/Ha	300-500 L/Ha

ENVIRONMENTAL STEWARDSHIP

Sportsturf Managers are collectively some of the greatest ambassadors for Environmental Stewardship anywhere on our planet! That's why it's important for all the turf professionals that use our Sportsturf Products to realise that whilst they are performing daily environmental stewardship at their own sportsturf complexes, they are also (WITH EVERY 1 LITRE PURCHASED) helping to protect our Australian inland rivers from the No. 1 pest currently destroying the bio-diversity and health of these river systems.... European Carp!

We at Long Paddock Organic Solutions as well as our good friends at Charlie Carp would like to thank ALL Turf Managers for supporting our effort in protecting our precious and fragile inland rivers.

LONG PADDOCK SPORTSTURF RANGE - NATURALLY SUSTAINABLE
