

Reserve™ STRESSGARD®

Disease Control | Stress Management | Plant Health

Reserve™ *StressGard*® Turf Fungicide is a contact and protectant fungicide for the control of fungal diseases in turf.

With the added benefit of *StressGard*® Formulation Technology, Reserve *StressGard* unlocks the full potential of a disease management program with Signature® and Interface® *StressGard*.

Key features

- ✓ Innovative and premium *Chlorothalonil* formulation
- ✓ Effective control of a broad spectrum of key turf diseases
- ✓ Contains *StressGard*® Formulation Technology
- ✓ Enhances turf health benefits when incorporated into preventative programs with Signature and Interface *Stressgard*
- ✓ Excellent tank mix compatibility – ideal tank mix partner for Signature
- ✓ Low risk of resistance development due to multi-site mode of action

StressGard® Formulation Technology (FT) is composed of active ingredients, inert ingredients and Bayer's advanced formulation technology which combine to improve the ability of Bayer fungicides to deliver excellent turf quality above and beyond disease control.

Bayer fungicides formulated with *StressGard* FT are proven to give outstanding disease control while alleviating plant stresses, ultimately improving turf quality, density, colour and playability. That's because Bayer *StressGard* FT fungicides have stacked technologies:

- ✓ Fungicide activity
- ✓ Colour enhancement
- ✓ Selective radiation management
- ✓ Photosynthesis enhancement
- ✓ Plant defence induction
- ✓ Summer turf safety

The benefits add up to excellent disease control, enhanced turf colour and density, and overall improvements in turf quality.

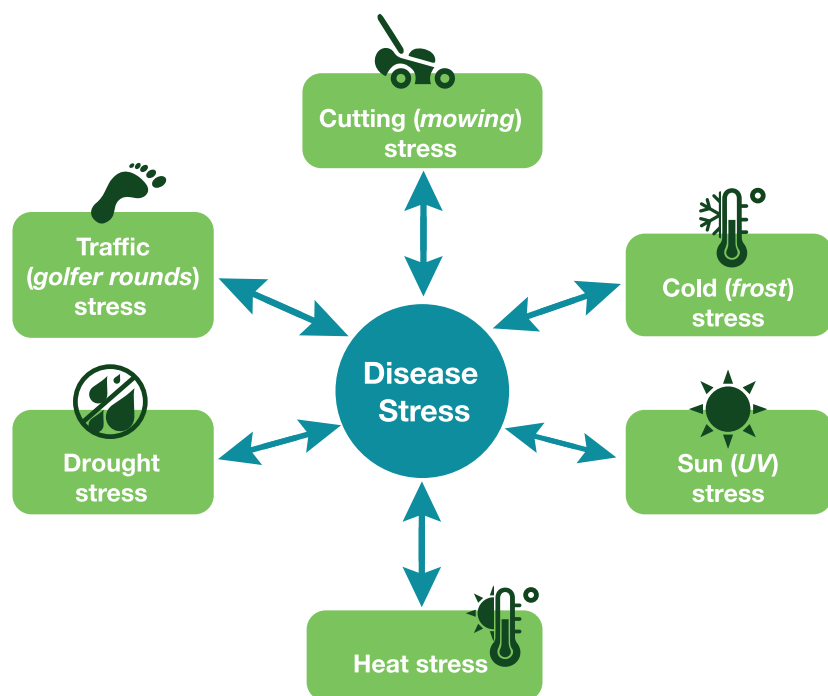

Reserve™ STRESSGARD®

Diseases Controlled

- Dollar Spot
- Brown Patch
- Gray Leaf Spot

Areas of use

Golf greens, Bowling greens,
Turf and Lawns

Best practice guidelines

- > Reserve *StressGard* can be used in programs between the application of other mode of action fungicides or tank-mixed with other fungicides to keep up group rotation.
- > For most effective disease control good application coverage must be achieved before disease outbreak occurs.
- > Reserve *StressGard* is a contact and protectant fungicide and does not penetrate inside the turfgrass tissue.
- > Reserve *StressGard* is a member of the multi-site activity group of fungicides. For fungicide resistance management, this product is a Group M5 fungicide.

Product Profile

Active Ingredient:

720 g/L Chlorothalonil

Chemical Group:

Group M5 Fungicide

Formulation Type:

Suspension Concentrate

Pack sizes available: 10 L

Product safety

When preparing spray and using the prepared spray wear cotton overalls buttoned to the neck and wrist and a washable hat, elbow-length PVC gloves and goggles and disposable mist face mask covering mouth and nose. Read the registered product label prior to use.

Regulatory information

All pesticides are regulated in Australia under the Agricultural and Veterinary Chemicals Code Act 1994 to ensure that they do not pose an unacceptable risk to human health and the environment.

For information regarding the pesticide regulatory process please visit the Australian Pesticides and Veterinary Medicines Authority website at www.apvma.gov.au

ALWAYS READ AND FOLLOW THE REGISTERED PRODUCT LABEL PRIOR TO USE.
