

Long Paddock Sportsturf Organic

Natural liquid fish concentrate plus kelp

The Long Paddock Sportsturf Range is designed for progressive Turf Managers seeking biological and environmental outcomes to their turf management programs

PRODUCT BENEFITS

- Encourages beneficial soil microbial stimulation
- Increases soil carbon
- Assists in the breakdown of organic matter
- Low salt NPK+TE provides immediate relief with plant nutrient deficiencies especially when turf is recovering from stress
- Natural fish oils enhance nutrient uptake via leaf, stem & root absorption
- The unique processing of the whole European Carp provides natural minerals, vitamins, oils, proteins, amino acids and beneficial microbes
- Promotes even growth without surge effects
- The addition of the Kelp is an essential bio-supplement which can provide; enhanced frost resistance, bio balancing, root promotion and stress resistance
- Promotes strong brix levels that improve the plants natural immune systems

Landscape Gardens (Apply until run off with Hand Gun or Fish Mouth nozzle)	20-25 L/Ha	300-500 L/Ha

ENVIRONMENTAL STEWARDSHIP

Sportsturf Managers are collectively some of the greatest ambassadors for Environmental Stewardship anywhere on our planet! That's why it's important for all the turf professionals that use our Sportsturf Products to realise that whilst they are performing daily environmental stewardship at their own sportsturf complexes, they are also (WITH EVERY LITRE PURCHASED) helping to protect our Australian inland rivers from the No. 1 pest currently destroying the bio-diversity and health of these river systems.... European Carp!

We at Long Paddock Organic Solutions as well as our good friends at Charlie Carp would like to thank ALL Turf Managers for supporting our effort in protecting our precious and fragile inland rivers.

LONG PADDOCK SPORTSTURF RANGE - NATURALLY SUSTAINABLE

Made from whole European Carp
